

LDBody

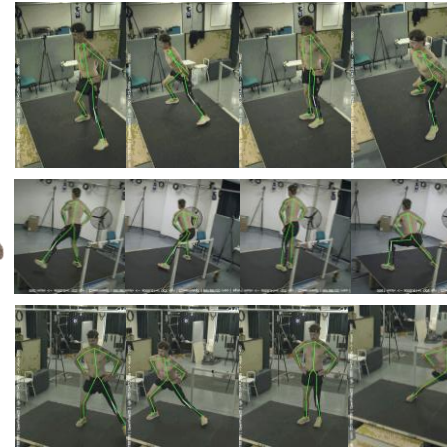

Motion - 1,088 calibrated multi-view videos

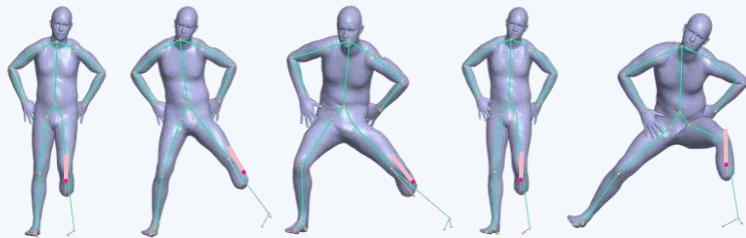

(a) 8 synchronized RGB cameras +
Vicon motion capture

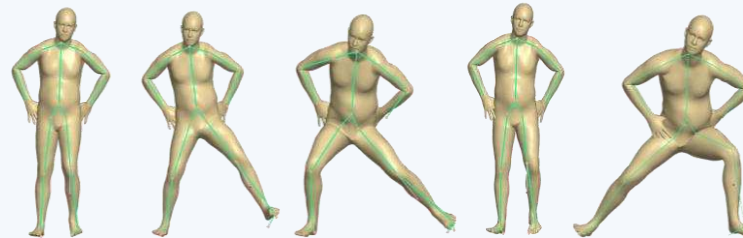

(b) Individuals with limb
deficiency

(c) Multi-view 2D 136 tests

With a residual limb

With a prosthesis

(d) 3D keypoints and Vicon-constrained mesh fitting for individuals with limb deficiency with and without prosthesis

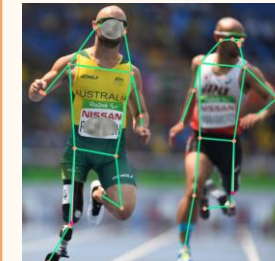

Image - 8,866 In-the-wild images from diverse subjects, scenes and prostheses

Sports with running
blade+ residual limb
below knee

Rehabilitation with
mechanical
prosthesis + residual
limb below knee

Daily life with
upper limb
prosthesis

Sports with
running blade
+ residual limb
above knee

Daily life with
mechanical
prosthesis +
residual limb
above knee

Daily life with
upper limb
prosthesis

Benchmark Tasks

Unified annotations and
evaluation for 2D pose, 3D pose,
and 3D mesh.

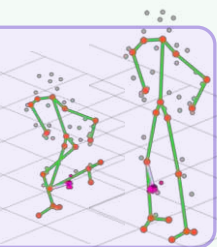

2D Pose

Multi-view & in-the-wild
2D keypoints

3D Pose

3D keypoints with
residual limb end and
prosthesis landmarks

3D Mesh

Parameterized human
mesh with limb topology
and shape variation
